Accounting and Financial Analysis in the Hospitality Industry Jun 14 2021 The objective of this textbook is to teach students to be conversational in speaking "numbers." This means understanding fundamental accounting concepts, developing solid financial analysis abilities, and then applying them to understand and improve the operational performance of their hotel or restaurant. The book will accomplish this by studying the current practices of some of today's leading hotel and restaurant companies. Chapters will be developed under the auspices of a select group of hospitality industry General Managers, Directors of Finance, and Regional Accounting Managers to ensure that the information is current, accurate and useful. Understanding and applying the information will be the main focus of this book. This textbook should provide hospitality managers the knowledge and experience to be comfortable in using numbers to operate their departments. This includes developing the ability to perform all accounting and financial aspects of their position efficiently and correctly including revenue forecasting, wage scheduling, budgeting, P&L critiques, purchasing procedures and cost control methods. As a result, they will have more time to spend on the floor with their customers and employees. This knowledge will help them understand their operations and how to improve, change or expand them to increase revenues or profits.

Multivariate Analysis in the Pharmaceutical Industry Dec 21 2021 Multivariate Analysis in the Pharmaceutical Industry provides industry practitioners with guidance on multivariate data methods and their applications over the lifecycle of a pharmaceutical product, from process development, to routine manufacturing, focusing on the challenges specific to each step. It includes an overview of regulatory guidance specific to the use of these methods, along with perspectives on the applications of these methods that allow for testing, monitoring and controlling products and processes. The book seeks to put multivariate analysis into a pharmaceutical context for the benefit of pharmaceutical practitioners, potential practitioners, managers and regulators. Users will find a resources that addresses an unmet need on how pharmaceutical industry professionals can extract value from data that is routinely collected on products and processes, especially as these techniques become more widely used, and ultimately, expected by regulators. Targets pharmaceutical industry practitioners and regulatory staff by addressing industry specific challenges Includes case studies from different pharmaceutical companies and across product lifecycle of to introduce readers to the breadth of applications Contains information on the current regulatory framework which will shape how multivariate analysis (MVA) is used in years to come

Loyalty Programs Feb 08 2021

Dynamic Risk Analysis in the Chemical and Petroleum Industry Sep 17 2021 Dynamic Risk Analysis in the Chemical and Petroleum Industry focuses on bridging the gap between research and industry by responding to the following questions: What are the most relevant developments of risk analysis? How can these studies help industry in the prevention of major accidents? Paltrinieri and Khan provide support for professionals who plan to improve risk analysis by introducing innovative techniques and exploiting the potential of data share and process technologies. This concrete reference within an ever-growing variety of innovations will be most helpful to process safety managers, HSE managers, safety engineers and safety engineering students. This book is divided into four parts. The Introduction provides an overview of the state-of-the-art risk analysis methods and the most up-to-date popular definitions of accident scenarios. The second section on Dynamic Risk Analysis shows the dynamic evolution of risk analysis and covers Hazard Identification, Frequency Analysis, Consequence Analysis and Establishing the Risk Picture. The third section on Interaction with Parallel Disciplines illustrates the interaction between risk analysis and other disciplines from parallel fields, such as the nuclear, the economic and the financial sectors. The final section on Dynamic Risk Management addresses risk management, which may dynamically learn from itself and improve in a spiral process leading to a resilient system. Helps dynamic analysis and management of risk in chemical and process industry Provides industry examples and techniques to assist you with risk- based decision making Addresses also the human, economic and reputational aspects composing the overall risk picture

Data Envelopment Analysis in the Financial Services Industry Aug 17 2021 This book presents the methodology and applications of Data Envelopment Analysis (DEA) in measuring productivity, efficiency and effectiveness in Financial Services firms such as banks, bank branches, stock markets, pension funds, mutual funds, insurance firms, credit unions, risk tolerance, and corporate failure prediction. Financial service DEA research includes banking; insurance businesses; hedge, pension and mutual funds; and credit unions. Significant business transactions among financial service organizations such as bank mergers and acquisitions and valuation of IPOs have also been the focus of DEA research. The book looks at the range of DEA uses for financial services by presenting prior studies, examining the current capabilities reflected in the most recent research, and projecting future new uses of DEA in finance related applications.

[Quantitative Tourism Industry Analysis](#) Sep 29 2022 Quantitative Tourism Industry Analysis is the first book to deal with the input-output, social accounting matrix in a way which readers from a non-economics or non-mathematical background can follow, in order to understand how useful their application would be for tourism industry analysis. It acquaints readers with useful applications of economic modelling without the unnecessary burden of higher algebra, so that they will understand concepts of the economics measurement system, Tourism Satellite Accounts (TSA) methodology. Quantitative Tourism Industry Analysis offers a new set of economic tools for tourism policy analysis, ideal for those with a non-mathematical background.

Entertainment Industry Economics Jun 26 2022 In this newly revised book, Harold L. Vogel examines the business economics of the major entertainment

enterprises: movies, music, television programming, broadcasting, cable, casino gambling and wagering, publishing, performing arts, sports, theme parks, and toys and games. The seventh edition has been further revised and broadened and differs from its predecessors by restructuring and repositioning the previous Internet chapter, including new material on the economics of networks and advertising, adding a new section on policy implications, and further expanding the section on recent theoretical work pertaining to box-office behaviour. The result is a comprehensive up-to-date reference guide on the economics, financing, production, and marketing of entertainment in the United States and overseas. Investors, business executives, accountants, lawyers, arts administrators, and general readers will find that the book offers an invaluable guide to how entertainment industries operate.

Competitive Strategy Oct 07 2020 Porter's five forces analysis is a framework for analyzing the level of competition within an industry and business strategy development. It draws upon industrial organization (IO) economics to derive five forces that determine the competitive intensity and therefore the attractiveness of an industry. Attractiveness in this context refers to the overall industry profitability. An "unattractive" industry is one in which the combination of these five forces acts to drive down overall profitability. A very unattractive industry would be one approaching "pure competition," in which available profits for all firms are driven to normal profit. This analysis is associated with its principal innovator Michael E. Porter of Harvard University. This updated and expanded second edition of Book provides a user-friendly introduction to the subject, Taking a clear structural framework, it guides the reader through the subject's core elements. A flowing writing style combines with the use of illustrations and diagrams throughout the text to ensure the reader understands even the most complex of concepts. This succinct and enlightening overview is a required reading for all those interested in the subject . We hope you find this book useful in shaping your future career & Business.

Company Analysis Apr 12 2021 It is vital for organisations to use company analysis to gain understanding of their limiting and enabling factors and strategic capabilities. Profits can then be maximised by selecting the most effective strategies, and through successful implementation of mergers, acquisitions and divestment opportunities. In this book Jenster and Hussey move away from the opinion based SWOT analysis commonly used, to provide a more objective step-by-step approach to objectively analysing an organisation. This important task is clearly explained, with information helpfully displayed in diagrams, and checklists of critical questions provided. In addition to the key, functional areas of management, corporate-wide approaches such as core competencies, critical success factors, industry analysis and the value chain are also examined. The book is illuminated with examples from the authors' own experiences, resulting in a practical and effective approach which will provide a foundation for corporate strategy and add a strategic dimension to a due diligence study - and so prove invaluable to MBA students and lecturers in strategic management. Every manager will be asked to participate in assessing strengths and weaknesses at some time in their career, and this book enables a considerable improvement to be made to many commonly used methods - and for those responsible for the development of strategies, it offers even more.

The U.S. Brewing Industry Feb 20 2022 A definitive study that uses a blend of theory, history, and data to analyze the evolution of the US brewing industry; draws on theoretical tools of industrial organization, game theory, and management strategy. This definitive study uses theory, history, and data to analyze the evolution of the US brewing industry from a fragmented market to an emerging oligopoly. Drawing on a rich and extensive data set and applying the theoretical tools of industrial organization, game theory, and management strategy, the authors provide new quantitative and qualitative perspectives on an industry they characterize as "a veritable market laboratory." The US brewing industry illustrates many of the important topics in industrial organization, economic policy, and business strategy, including industry concentration, technological change, brand proliferation, and mixed pricing strategies. After giving an overview of the industry, Tremblay and Tremblay discuss basic demand and cost conditions and industry concentration. They describe the evolution of the leading mass-producing brewers and the emergence of both specialty brewers and imports. They analyze the history and the causes of product and brand proliferation (showing how product proliferation leads to firm dominance), discuss price, advertising, merger, and other management strategies, and examine the industry's economic performance. Finally, they discuss public policy, including anti-trust and public health issues. The authors' set of industry, firm, and brand data for the period 1950-2002 -- the most comprehensive data set of economic variables available for an oligopolistic industry -- will be available to purchasers of the book who send an e-mail request. Data sources are listed in an appendix. Robert S. Weinberg, a management strategy scholar and leading consultant to the brewing industry, contributes a foreword. This ambitious, authoritative work, capping the authors' 25-year study of the brewing industry, will be a valuable resource for industry analysts, economists, and students of industrial organization.

Travel Industry Economics Jul 16 2021 Each year, people around the world spend well over one trillion dollars on travel and tourism, making this sector the world's largest, with employment of 300 million people, one-tenth of the global workforce. In this book Harold L. Vogel examines the business economics and investment aspects of major industry components that include airlines, hotels, casinos, amusement and theme parks, and tourism. The result is a concise, up-to-date reference guide for financial analysts, economists, industry executives, legislators, regulators, and journalists interested in the economics, financing, and marketing of travel-related goods and services. The new edition expands coverage to airport management, Asian gaming, recreational resorts, restaurants, private jet services, and advertising. Sections on the pricing and availability of oil and public policy issues such as antitrust and predation have also been added. A glossary, timeline diagrams, and technical appendices enhance the book's appeal as a reference tool. Its fully integrated assessment of the business of travel makes the work unique in the marketplace.

Crowdfunding: Overview of the Industry, Regulation and Role of Crowdfunding in the Venture Startup Nov 27 2019 This book aims to take stock and systemize existing knowledge on crowdfunding while providing overview of the industry, its regulatory environment and advancing the insight into the role of crowdfunding in the startup lifecycle. It is adopting an exploratory and phenomenon-based approach which is deemed appropriate when investigating rather new phenomena. Furthermore, the research combines survey and interview methodologies to assess the opinion and real-world behavior of different stakeholders in crowdfunding marketplace and identify gaps requiring further academic consideration. Empirical data was gathered using multiple interactive web-based questionnaires distributed to different stakeholders and "informed general public" mainly through the social networks (LinkedIn, Facebook and Twitter) and direct solicitation of entrepreneurial associations, networks and online communities. The study conducted relies on both qualitative and quantitative analysis in attempt to find data patterns useful in future research and establish some managerial and policymaker recommendations based on limited evidence collected. The work adds value to this field through a 3-fold contribution: Taking a look at crowdfunding through the prism of SWOT analysis of the practice itself and Porter's 5 forces analysis of crowdfunding platforms industry. Providing evidence in favor of implementing various degrees of regulation based on different crowdfunding categories, using the Italian case of equity-based crowdfunding regulation as a model. Finally, it yields some interesting findings on relevance of crowdfunding in the venture startup while pointing out key motivators which make entrepreneurs consider this fundraising option. In addition, related policymaker/managerial implications are exposed and academic literature updated with reference to contemporary developments in this dynamic field.

Accounting and Financial Analysis in the Hospitality Industry May 14 2021 The objective of this textbook is to teach students to be conversational in speaking "numbers." This means understanding fundamental accounting concepts, developing solid financial analysis abilities, and then applying them to understand and improve the operational performance of their hotel or restaurant. The book will accomplish this by studying the current practices of some of today's leading hotel and restaurant companies. Chapters will be developed under the auspices of a select group of hospitality industry General Managers, Directors of Finance, and Regional Accounting Managers to ensure that the information is current, accurate and useful. Understanding and applying the information will be the main focus of this book. This textbook should provide hospitality managers the knowledge and experience to be comfortable in using numbers to operate their departments. Analysis Based on Neutrosophic Cognitive Maps: A Case Study for Food Industry PEST Analysis Based on A Case Study for Food I Nov 07 2020 Neutrosophic cognitive maps and its application in decision making have become a topic of great importance for researchers and practitioners alike. PEST (Political, Economic, Social and Technological), analysis is a precondition analysis with the main functions of the identification of the environment within which and organization or project the operates and providing data and information for enabling the organization to make predictions about new situations and circumstances.

Plunkett's Telecommunications Industry Almanac 2008: Telecommunications Industry Market Research, Statistics, Trends & Leading Companies Jul 04 2020 Plunkett's Telecommunications Industry Almanac 2008 is the only complete reference guide to the telecommunications technologies and companies that are

changing the way the world communicates today. This massive reference book's market research section provides complete access to the U.S. telecommunications and communications industry. This section includes over a dozen major statistical tables covering everything from revenues for the fixed line and wireless service sectors, to the number of telephone subscribers worldwide, to telephone equipment import and export market numbers. Finally, in this carefully-researched volume, you will receive an abundance of data on: national and global telecommunications statistics, new telecommunications technology, telecommunications market forecasts, telecommunications trends and leading telecommunications companies. In the corporate profiles section, you'll receive vital details on the "Telecommunications 500 Firms," the largest, most successful corporations in all facets of the telecommunications business. These in-depth profiles include corporate name, address, phone, fax, web site, growth plans, competitive advantage, financial histories and up to 27 executive contacts by title. You will also find information regarding local exchange and long distance telephone service markets and trends, wireless and cellular telephone markets and trends, satellite telecommunications, Wi-Fi, telephone industry equipment, software and support. Telecommunications is one of the fastest-growing and most dynamic industries in the world today, and Plunkett's Telecommunications Industry Almanac will be your guide to this rapidly-changing business. Purchasers of the printed book or PDF version may receive a free CD-ROM database of the corporate profiles, enabling export of vital corporate data for mail merge and other uses.

Developments in the Call Centre Industry Apr 24 2022 Over the past ten years there has been a massive growth in call centres worldwide. These centres are said to represent the most dynamic growth area in white-collar employment internationally since the mid 1990s. Yet the footloose and global nature of the industry means that jobs will always be susceptible to outsourced operations, ICT developments, public sector subsidization of business restructuring and re-location, and cheaper operations elsewhere. This book conducts a thorough analysis of this modern phenomenon.

Industry Analysis Workbook May 26 2022

Sport Industry Research and Analysis Dec 09 2020 Sport Industry Research & Analysis offers a no-nonsense, straightforward approach to the study of research design and statistical analysis in the sport enterprise. Each chapter outlines real-world instances in which research and statistics contribute to bottom-line decisions. The book includes clear, progressive instructions, using spreadsheets for statistical computations and analyses. The explanations for the calculations and analyses are presented in the context of sport industry scenarios with sample data. Additional scenarios with sample data provide hands-on practice with each statistical test. "In Practice" contributions from sport industry professionals demonstrate how these practitioners use research and statistical analysis in their everyday tasks. This book's succinct, applied approach to research design and statistical analyses provides readers with essential skills to help them understand the importance of an information-based approach to decision making in the sport enterprise.

Analysis of the North American Cruise Industry Nov 19 2021

The Feature Film Distribution Deal Sep 25 2019 John W. Cones, whose real goal is to stimulate a long-term film industry reform movement, shows how the financial control of the film industry in the hands of the major studios and distributors actually translates into creative control of the industry. Cones discusses the pros and cons of the debate relating to the industry's so-called net profit problem and the way in which the distribution deal plays an integral part in that problem. He then breaks down five major film finance/distribution scenarios, explaining various distribution deals and suggesting ways of negotiating distribution. Critically examining the specific terms of the distribution deal itself, Cones covers gross receipts exclusions, distributor fees, and distribution expenses. He also investigates the various forms of interest, issues of production costs, matters of creative control, and general contractual provisions. For handy reference, Cones includes an extensive checklist for negotiating any feature film distribution deal. The list deals with distribution fees, distribution expenses, interest, production costs, creative control issues, general contractual provisions, distributor commitments, and the limits of negotiating. His nine appendices present a "Motion Picture Industry Overview," "Profit Participation Audit Firms," "ADI (Top 50) Market Rankings," an "AFMA Member List, 1992?1993," a "Production-Financing/Distribution Agreement," a "Negative Pickup Distribution Agreement," a "Distribution Rights Acquisition Agreement," a "Distribution Agreement (Rent-a-Distributor Deal)," and a "Foreign Distribution Agreement." Cones wrote this book for independent producers, executive and associate producers and their representatives, directors, actors, screenwriters, members of talent guilds, distributors, and entertainment, antitrust, and securities attorneys. Securities issuers and dealers, investment bankers, and money finders, investors, and financiers of every sort also will be interested. In addition, Cones suggests and hopes that the book will interest "Congress, their research staff, government regulators at the Internal Revenue Service, the Securities and Exchange Commission, the Federal Trade Commission, and law enforcement officials such as the Los Angeles District Attorney and the U.S. Justice Department."

A Political Economy Analysis of China's Civil Aviation Industry Aug 24 2019 Annotation Deals with all the aspects of the application of column and mass stabilisation. It provides a description of the best practice, mainly based on the experiences at seven test sites of the European project EuroSoilStab.

Float Glass Innovation in the Flat Glass Industry Jan 10 2021 A thorough industry analysis is of utmost importance for a study on the impact of technological changes on industry structure. This book evaluates the consequences of a vaguely chosen level of an industry analysis. Too broad a definition of the industry may disaggregate sub-industries, processing industries and international aspects. This is illustrated by revisiting an industry study upon which the dominant design model was based. Readers will see and understand the consequences of too broadly defined industries together with quantitative research approach can have. The book argues that the nature of the industry should define the level of the analysis. This is done by revisiting the flat glass industry study, on which Anderson and Tushman's (1990) dominant design model is partly based. In their study Anderson and Tushman defined the flat glass industry based on four-digit SIC codes. It is argued that this definition was too broad and it disaggregated important sub-industries, processing industries and international aspects. This study uses more accurate analysis in five-digit SIC codes. The empirical findings of this study and Anderson and Tushman's study are different. Their broader industry definition revealed only the flat glass industry not two sub-industries: plate glass and sheet glass. According to this study the nature of the industry should define the level of the analysis and performance parameter should defined be based on effectiveness instead of efficiency of the innovation. As a consequence of these clarifications this study regards contrary to Anderson and Tushman float glass as the dominant design.

Analysis of the British Construction Industry Jan 22 2022 This is a critical and descriptive analysis of the UK construction industry based on up-to-date statistics. The emphasis is on the industry as a whole, including its associated professions, rather than on individual firms or projects. Dr Hillebrandt examines

the structure and resources of the industry, the demands made on it and its responses. A concise and comprehensive picture of the industry is given which will enable readers to understand what it does, how it works and how it is likely to develop.

Plunkett's Food Industry Almanac 2008: Food Industry Market Research, Statistics, Trends & Leading Companies Jan 28 2020 The food industry is among the most competitive and globally-linked of all business sectors. For example, many of America's best-known food packagers, such as Heinz, get 30%, 50% and even higher percentages of their total revenues from outside the U.S. Plunkett's Food Industry Almanac will be your guide to the entire food business, from production to distribution to retailing. On the supermarket side, giant, nationwide supermarket chains like Albertson's and Kroger are battling the ever-increasing market share and incredibly low retail prices offered in the immense grocery departments at Wal-Mart Supercenters. Many retailers are learning how to successfully combine bricks-and-clicks, taking grocery orders online and then fulfilling those orders through existing supermarkets. Moreover, food producers, distributors and retailers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (with database on CD-ROM) covers everything you need to know about the food, beverage and tobacco industry, including: Analysis of major trends and markets; Historical statistics and tables; Major food producers such as Kraft and Frito Lay; Retailers of all types, from convenience store operators to giant supermarket chains; Emerging technologies including genetically-engineered foods; Giant distributors such as Sysco; Beverage companies such as Coca-Cola; Wine, liquor and beer producers; Tobacco, candy and gum ; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, a food industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of nearly 400 leading companies in all facets of the food and beverage industry. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

Industry Analysis Jul 28 2022 A Strategy course about the structural analysis of industries, competitive strategies, competitor analysis, competitive moves, strategy toward buyers and suppliers, structural analysis within industries and industry evolution competitive strategy within various generic industry environments are discussed, such as fragmented industries, emerging industries, mature industries, declining industries and global industries.

Quantile-Based Reliability Analysis Jun 22 2019 This book provides a fresh approach to reliability theory, an area that has gained increasing relevance in fields from statistics and engineering to demography and insurance. Its innovative use of quantile functions gives an analysis of lifetime data that is generally simpler, more robust, and more accurate than the traditional methods, and opens the door for further research in a wide variety of fields involving statistical analysis. In addition, the book can be used to good effect in the classroom as a text for advanced undergraduate and graduate courses in Reliability and Statistics.

Security Analysis and Business Valuation on Wall Street, + Companion Web Site Dec 29 2019 An insider's look at security analysis and business valuation, as practiced by Wall Street, Corporate America, and international businesses Two major market crashes, numerous financial and accounting scandals, growth in private equity and hedge funds, Sarbanes Oxley and related regulations, and international developments changed security analysis and business valuation substantially over the last fourteen years. These events necessitated a second edition of this modern classic, praised earlier by Barron's as a "welcome successor to Graham and Dodd" and used in the global CFA exam. This authoritative book shows the rational, rigorous analysis is still the most successful way to evaluate securities. It picks up where Graham and Dodd's bestselling Security Analysis - for decades considered the definitive word on the subject - leaves off. Providing a practical viewpoint, Security Analysis on Wall Street shows how the values of common stock are really determined in today's marketplace. Incorporating dozens of real-world examples, and spotlighting many special analysis cases - including cash flow stocks, unusual industries and distressed securities - this comprehensive resource delivers all the answers to your questions about security analysis and corporate valuation on Wall Street. The Second Edition of Security Analysis on Wall Street examines how mutual funds, private equity funds, hedge funds, institutional money managers, investment banks, business appraisers, and corporate acquirers perform their craft of security analysis and business valuation in today's highly charged environment. Completely updated to reflect the latest methodologies, this reliable resource represents the most comprehensive book written by someone who has actually worked as an investment banker, private equity executive, and international institutional investor. Shows the methodical process that practitioners use to value common stocks and operating companies and to make buy/sell decisions Discusses the impact of the two stock market crashes, the accounting and financial scandals, and the new regulations on the evaluation process Covers how Internet and computing power automate portions of the research and analytical effort Includes new case study examples representative of valuation issues faced daily by mutual funds, private equity funds, hedge funds, institutional investors, investment banks, business appraisers, and corporate acquirers Is a perfect tool for professors wishing to show their MBA students the essential tools of equity and business valuation Security analysis and business valuation are core financial disciplines for Wall Streeters, corporate acquirers, and international investors. The Second Edition of Security Analysis on Wall Street is an important book for anyone who needs a solid grounding in these critical finance topics.

Revenue Management and Survival Analysis in the Automobile Industry Mar 24 2022 André Jerez develops a price-based revenue management framework to support retailers in establishing better and more profitable pricing strategies, including assigning an initial asking price and the adjustment of price over time.

A Strategic Analysis of the Construction Industry in the United Arab Emirates Mar 31 2020 Inhaltsangabe:Introduction: The construction industry is one of the most booming industries in the world. In particular, in the United Arab Emirates this industry has experienced a constant growth over the course of the last few years. Driven by the UAE's oil wealth, the country has witnessed an unmatched development and transformation. Oil revenues have led to a driving construction boom and completely change the face of the state. The construction industry is still one of the engines of economic growth in the UAE. One of the highest concentrations of cranes in the world speaks volumes about the incredible pace of construction taking place, particularly in Dubai and Abu Dhabi, but also in the other emirates. The fact that about 30,000, or 24 percent of the world's 125,000 construction cranes are currently operating in the region speaks for itself. The UAE's construction projects stand out clearly from building projects in other parts of the world, due to the fact that there is no constraint on constructional imagination and there is no place in the world where construction moves as fast as in the UAE. With some of the most innovative mega projects such as Burj Khalifa (the tallest building in the world), or The Palm Jumeirah, The Palm Jebel Ali and The Palm Deira (the world's largest man-made islands) with epithets of world's biggest, best, and tallest the UAE construction industry remains unbeaten. The construction industry is a complex environment in which each organization is faced with numerous opportunities and threats. This academic paper provides an in-depth analysis of the fast growing construction industry in the UAE, while scanning the construction business for opportunities and threats. This thesis implements the PESTEL analysis that will be used to analyze the UAE's construction industry. The main objective of this paper is to identify the factors in the macro-environment that might affect an organization. Having the PESTEL context, this output is used to execute a SWOT analysis. The PESTEL factors combined with external micro-environmental factors are classified as opportunities and threats in a SWOT analysis. Thus, the thesis also aims to identify the opportunities and threats in the construction business. This academic paper does not assess company's internal strengths and weaknesses. Through strategic analysis of the UAE's construction business this paper creates an adequate framework that helps participants of the [...]
