[Improving the Measurement of Late-Life Disability in Population Surveys](#) Sep 27 2022 *Improving the Measurement of Late-Life Disability in Population Surveys* summarizes a workshop organized to draw upon recent advances to improve the measurement of physical and cognitive disability in population surveys of the elderly population. The book questions whether or not the measures of activities of daily living and instrumental activities of daily living used in many population surveys are sufficient as the primary survey-based indicators of late-life disability. If not, should they be refined or should they be supplemented by other measures of disability in surveys? If yes, in what ways should disability measures be changed or modified to produce population estimates of late-life disability and to monitor trends? The book also discusses what further research is needed to advance this effort.

Healthy Longevity in China Mar 09 2021 Key research in the world's largest aging population – in China – has fed into this important new work, which aims to answer questions critical to older people worldwide. These include: is the period of disability compressing or expanding with increasing life expectancy and what factors are associated with these trends in the recent decades? And is it possible to realize morbidity compression with a prolongation of the life span in the future? Essential reading for gerontologists.

Measuring Literacy Sep 03 2020 The National Assessment of Adult Literacy (NAAL) is a household survey conducted periodically by the Department of Education that evaluates the literacy skills of a sample of adults in the United States ages 16 and older. NAAL results are used to characterize adults' literacy skills and to inform policy and programmatic decisions. The Committee on Performance Levels for Adult Literacy was convened at the Department's request for assistance in determining a means for booking assessment results that would be useful and understandable for NAAL's many varied audiences. Through a process detailed in the book, the committee determined that five performance level categories should be used to characterize adults' literacy skills: nonliterate in English, below basic literacy, basic literacy, intermediate literacy, and advanced literacy. This book documents the process the committee used to determine these performance categories, estimates the percentages of adults whose literacy skills fall into each category, recommends ways to communicate about adults' literacy skills based on NAAL, and makes suggestions for ways to improve future assessments of adult literacy.

Physical Rehabilitation - E-Book Oct 24 2019 The only physical rehabilitation text modeled after the concepts of the APTA's Guide to Physical Therapist Practice, 2nd Edition, this detailed resource provides the most complete coverage of rehabilitation across the preferred practice patterns of physical therapy all in one place! Each chapter is consistently organized to make it easy to find the information you need, with clear guidelines, examples, and summaries based on the latest clinical evidence to help you improve quality of care and ensure positive patient outcomes. In-depth, evidence-based coverage of more key content areas than any other rehabilitation resource of its kind, including orthopedics, neurology, and wound management, ensures a comprehensive understanding of rehabilitation supported by the latest clinical research. More than 65 case studies present a problem-based approach to rehabilitation and detail practical, real-world applications. Over 600 full-color illustrations clarify concepts and techniques. A FREE companion CD prepares you for practice with printable examination forms and reference lists from the text linked to Medline abstracts and reinforces understanding through interactive boards-style review questions, and vocabulary-building exercises.

Losing a Million Minds May 11 2021 Prepared at the request of several committees of Congress, this report discusses the medical, social, political, and financial aspects of dementia in the elderly and assesses the impact of these diseases on the Nation. The U.S. Office of Technology Assessment published this first government report on Alzheimer's disease in 1987.

An Introduction to Community & Public Health Jan 07 2021 The Ninth Edition of An Introduction to Community & Public Health provides the latest trends and statistics in community health. With an emphasis on developing the knowledge and skills necessary for a career in health education, this best-selling introductory text covers such topics as epidemiology, community organization, program planning, minority health, health care, mental health, environmental health, drugs, safety, and occupational health.

Brave Girl Sep 22 2019 An engagingly illustrated account of immigrant Clara Lemlich's pivotal role in the influential 1909 women laborer's strike describes how she worked grueling hours to acquire an education and support her family before organizing a massive walkout to protest the unfair working conditions in New York's garment district. 25,000 first printing.

Occupational Therapy Assessments for Older Adults May 23 2022 The role of measurement and the benefits of outcome measures are defined as important tools used to document change in one or more constructs over time, help to describe a client's condition, formulate a prognosis, as well as to evaluate the effects of occupational therapy intervention. *Occupational Therapy Assessments for Older Adults: 100 Instruments for Measuring Occupational Performance* presents over 100 outcome measures in the form of vignettes that encompass a brief description of each instrument, a review of its psychometric properties, its advantages and disadvantages, administration procedures, permissions to use, author contact information, as well as where and how to procure the instrument. *Occupational Therapy Assessments for Older Adults* by Dr. Kevin Bortnick narrows down the list of possible choices for the occupational therapy student or clinician to only those with an amount of peer review, bibliographic citations, as well as acceptance within the profession. The text also includes research-based information with text citations and has over 100 tables, diagrams, and figures. Included in the review of each outcome measure:
Description: A brief record of the measure. Psychometrics: A review of the level of research evidence that either supports or does not support the instrument, including such items as inter-rater, intra-rater, and test-retest reliabilities, as well as internal consistencies and construct validities among others. Advantages: Synopsis of the benefits of using the measure over others including its unique attributes. Disadvantages: A summary of its faults. For example, the amount of research evidence may be limited or the measure may be expensive. Administration: Information regarding how to administer, score, and interpret results. Permissions: How and where to procure the instrument, such as websites where it may be purchased or journal articles or publications that may contain the scale. Summary: A brief summation of important information. *Occupational Therapy Assessments for Older Adults: 100 Instruments for Measuring Occupational Performance* encourages occupational therapy and occupational therapy assistants to expand their thinking about the use of appropriate outcome measures with older adult populations. Using the appropriate outcome measure based on evidence can aid in the promotion of health, well-being, and participation of clients.

Adult Development and Well-Being May 31 2020 Foster well-being in an institutional setting Human services workers are consistently discovering more about how important adult well-being is as a foundation of positive human development. *Adult Development and Well-Being: The Impact of Institutional Environments* closely examines this relationship and provides creative strategies to improve outcomes for adults within institutional settings or systems. Leading experts discuss the latest research, offer insightful perspectives on adult development issues, and provide policy recommendations to effectively foster change. This important resource targets specific issues and provides practical answers to questions about how to positively affect human behavior by cultivating well-being. Social work professionals know that adult development and well-being are directly impacted by institutional setting. *Adult Development and Well-Being: The Impact of Institutional Environments* explores current theory, literature, and studies on the various positive or negative influences institutions has on the self and intimate and social relationships. This text is extensively referenced and includes various tables to clearly present data. Topics in *Adult Development and Well-Being: The Impact of Institutional Environments* include: the experiences of grandparents

raising grandchildren full time as a result of military deployment various influences on the adjustment to long-term care how the onset of mental illness impacts a person's sense of self and belief systems—and the value of the mental health system study of the impact of welfare reform policies on welfare and caregiving for low-income foster mothers the impact on normal sexual development for institutionalized individuals a study on the well-being of caregivers according to the kinship care arrangement burnout and turnover in social service organizations the impact of the United States Census on law, public policy, and distribution of privilege Adult Development and Well-Being: The Impact of Institutional Environments is crucial, eye-opening reading for social work professionals, policymakers, researchers, educators, and students.

Encyclopedia of Applied Psychology Jul 13 2021 Encompasses topics including aging (geropsychology), assessment, clinical, cognitive, community, counseling, educational, environmental, family, industrial/organizational, health, school, sports, and transportation psychology. Each entry provides a clear definition, a brief review of the theoretical basis, and emphasizes major areas of application.

Functional Assessment for Adults with Disabilities Aug 26 2022 The U.S. Social Security Administration (SSA) provides disability benefits through the Social Security Disability Insurance (SSDI) and Supplemental Security Income (SSI) programs. To receive SSDI or SSI disability benefits, an individual must meet the statutory definition of disability, which is "the inability to engage in any substantial gainful activity [SGA] by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months." SSA uses a five-step sequential process to determine whether an adult applicant meets this definition. Functional Assessment for Adults with Disabilities examines ways to collect information about an individual's physical and mental (cognitive and noncognitive) functional abilities relevant to work requirements. This report discusses the types of information that support findings of limitations in functional abilities relevant to work requirements, and provides findings and conclusions regarding the collection of information and assessment of functional abilities relevant to work requirements.

Developing a Protocol for Observational Comparative Effectiveness Research: A User's Guide Oct 16 2021 This User's Guide is a resource for investigators and stakeholders who develop and review observational comparative effectiveness research protocols. It explains how to (1) identify key considerations and best practices for research design; (2) build a protocol based on these standards and best practices; and (3) judge the adequacy and completeness of a protocol. Eleven chapters cover all aspects of research design, including: developing study objectives, defining and refining study questions, addressing the heterogeneity of treatment effect, characterizing exposure, selecting a comparator, defining and measuring outcomes, and identifying optimal data sources. Checklists of guidance and key considerations for protocols are provided at the end of each chapter. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews. More more information, please consult the Agency website: www.effectivehealthcare.ahrq.gov

Encyclopedia of Public Health Jul 01 2020 The Encyclopedic Reference of Public Health presents the most important definitions, principles and general perspectives of public health, written by experts of the different fields. The work includes more than 2,500 alphabetical entries. Entries comprise review-style articles, detailed essays and short definitions. Numerous figures and tables enhance understanding of this little-understood topic. Solidly structured and inclusive, this two-volume reference is an invaluable tool for clinical scientists and practitioners in academia, health care and industry, as well as students, teachers and interested laypersons.

Adults: A Sourcebook Apr 22 2022 Now, this updated and expanded two-volume edition of Fischer and Corcoran's standard reference enables professionals to gather this vital information easily and effectively. In *Measures for Clinical Practice, Volume 1: Couples, Families and Children* and *Volume 2: Adults*, Joel Fischer and Kevin Corcoran provide an extensive collection of over 320 "rapid assessment instruments" (RAIs), including questionnaires and scales, which assess virtually any problem commonly encountered in clinical practice. All instruments are actually reprinted in the book, and are critiqued by the authors to aid in their selection. The instruments included are brief and easy to administer and will be useful for all types of practice and all theoretical orientations.

The Dynamics of Disability Sep 15 2021 The Society Security disability program faces urgent challenges: more people receiving benefits than ever before, the prospect of even more claimants as baby boomers age, changing attitudes culminating in the Americans With Disabilities Act. Disability is now understood as a dynamic process, and Social Security must comprehend that process to plan adequately for the times ahead. *The Dynamics of Disability* provides expert analysis and recommendations in key areas: Understanding the current social, economic, and physical environmental factors in determining eligibility for disability benefits. Developing and implementing a monitoring system to measure and track trends in work disability. Improving the process for making decisions on disability claims. Building Social Security's capacity for conducting needed research. This book provides a wealth of detail on the workings of the Social Security disability program, recent and emerging disability trends, issues and previous experience in researching disability, and more. It will be of primary interest to

federal policy makers, the Congress, and researchersâ€"and it will be useful to state disability officials, medical and rehabilitation professionals, and the disability community.

Handbook of Psychiatric Measures Jul 21 2019 The Handbook of Psychiatric Measures offers a concise summary of key evaluations that you can easily incorporate into your daily practice. The measures will enhance the quality of patient care assisting you, both in diagnosis and assessment of outcomes. Comprising a wide range of methods available for assessing persons with mental health problems, the Handbook contains more than 275 rating methods, from the Abnormal Involuntary Movement Scale to the Zung Self-Rating Depression Scale. In this fully revised edition, more than 40 measures have been added both to the book and to the accompanying CD-ROM. The Handbook features: Thoroughly examined and revised measures that provide the most relevant and timely information for clinicians. New measures that empirically provide better patient evaluation Updated costs, translations, and contact information for each measure This handy compendium includes both diagnostic tools and measures of symptoms, function and quality of life, medication side effects, and other clinically relevant parameters. It focuses on measures that can be most readily used in either clinical practice or research. Most of the measures are designed to improve the reliability and validity of patient assessment over what might be accomplished in a standard clinical interview. The measures also demonstrate that the use of formal measures can improve the collection, synthesis, and reporting of information as compared with the use of unstructured examinations. Seventeen disorder-specific chapters, organized in DSM-IV-TR order, include measures for: Disorders of childhood and adolescence Cognitive disorders Sexual dysfunction Eating disorders Sleep disorders Aggression and much more. The discussion of each measure includes goals, description, practical issues, psychometric properties, and clinical utility, followed by references and suggested readings. This revised edition includes updated measure descriptions, new measure variants and research, and newly selected measures particularly appropriate to the domain of discussion. As a clinical tool, this book Describes how, when, and to what purpose measures are used Points out practical issues to consider in choosing a measure for clinical use Addresses limitations in the use of measures including ethnic, cultural, and socioeconomic factors that influence their interpretation Use of this special resource is further enhanced by a CD-ROM containing the full text of more than 150 of these measures -- an invaluable aid for reference and clinical decision-making.

Encyclopedia of Quality of Life and Well-Being Research Nov 05 2020 The aim of this encyclopedia is to provide a comprehensive reference work on scientific and other scholarly research on the quality of life, including health-related quality of life research or also called patient-reported outcomes research. Since the 1960s two overlapping but fairly distinct research communities and traditions have developed concerning ideas about the quality of life, individually and collectively, one with a fairly narrow focus on health-related issues and one with a quite broad focus. In many ways, the central issues of these fields have roots extending to the observations and speculations of ancient philosophers, creating a continuous exploration by diverse explorers in diverse historic and cultural circumstances over several centuries of the qualities of human existence. What we have not had so far is a single, multidimensional reference work connecting the most salient and important contributions to the relevant fields. Entries are organized alphabetically and cover basic concepts, relatively well established facts, lawlike and causal relations, theories, methods, standardized tests, biographic entries on significant figures, organizational profiles, indicators and indexes of qualities of individuals and of communities of diverse sizes, including rural areas, towns, cities, counties, provinces, states, regions, countries and groups of countries.

Introduction to Nonparametric Item Response Theory Aug 02 2020 This volume introduces social science students and researchers to the theory and practice of the highly powerful methods of nonparametric item response theory (IRT).

A Model of Human Occupation Aug 14 2021 Presenting the new edition of the text that delivers the most widely-used and developed conceptual model in occupational therapy. Beautifully redesigned and fully revised, the Third Edition of *A Model of Human Occupation* (MOHO) delivers the latest in human occupation research and application to practice. New to this edition: a reader-friendly format with second color and additional illustrations and anecdotes; more case examples for integrating the model into practice; a discussion of the therapy process and how change occurs; language linked to UT and ICDH-2 terminology; a research chapter; and numerous research references highlighting the growing body of evidence supporting MOHO.

Resilience in Aging Dec 26 2019 The many significant technological and medical advances of the 21st century cannot overcome the escalating risk posed to older adults by such stressors as pain, weakness, fatigue, depression, anxiety, memory and other cognitive deficits, hearing loss, visual impairment, isolation, marginalization, and physical and mental illness. In order to overcome these and other challenges, and to maintain as high a quality of life as possible, older adults and the professionals who treat them need to promote and develop the capacity for resilience, which is innate in all of us to some degree. The purpose of this book is to provide the current scientific theory, clinical guidelines, and real-world interventions with regard to resilience as a clinical tool. To that end, the book addresses such issues as concepts and operationalization of resilience; relevance of resilience to successful aging; impact of personality and genetics on resilience; relationship between resilience and motivation; relationship between resilience and survival; promoting resilience in long-term care; and the lifespan approach to resilience. By addressing ways in which the hypothetical and theoretical concepts of resilience can be applied in

geriatric practice, *Resilience in Aging* provides inroads to the current knowledge and practice of resilience from the perspectives of physiology, psychology, culture, creativity, and economics. In addition, the book considers the impact of resilience on critical aspects of life for older adults such as policy issues (e.g., nursing home policies, Medicare guidelines), health and wellness, motivation, spirituality, and survival. Following these discussions, the book focuses on interventions that increase resilience. The intervention chapters include case studies and are intended to be useful at the clinical level. The book concludes with a discussion of future directions in optimizing resilience in the elderly and the importance of a lifespan approach to aging.

End of Life: Helping with Comfort and Care Apr 29 2020 At the end of life, each story is different. Death comes suddenly, or a person lingers, gradually fading. For some older people, the body weakens while the mind stays alert. Others remain physically strong, but cognitive losses take a huge toll. Although everyone dies, each loss is personally felt by those close to the one who has died. End-of-life care is the term used to describe the support and medical care given during the time surrounding death. Such care does not happen only in the moments before breathing ceases and the heart stops beating. Older people often live with one or more chronic illnesses and need a lot of care for days, weeks, and even months before death. The goal of *End of Life: Helping with Comfort and Care* is to provide guidance and help in understanding the unfamiliar territory of death. This information is based on research, such as that supported by the National Institute on Aging (NIA), along with other parts of the National Institutes of Health.

Brocklehurst's Textbook of Geriatric Medicine and Gerontology E-Book Jun 19 2019 The leading reference in the field of geriatric care, *Brocklehurst's Textbook of Geriatric Medicine and Gerontology*, 8th Edition, provides a contemporary, global perspective on topics of importance to today's gerontologists, internal medicine physicians, and family doctors. An increased focus on frailty, along with coverage of key issues in gerontology, disease-specific geriatrics, and complex syndromes specific to the elderly, makes this 8th Edition the reference you'll turn to in order to meet the unique challenges posed by this growing patient population. Consistent discussions of clinical manifestations, diagnosis, prevention, treatment, and more make reference quick and easy. More than 250 figures, including algorithms, photographs, and tables, complement the text and help you find what you need on a given condition. Clinical relevance of the latest scientific findings helps you easily apply the material to everyday practice. A new chapter on frailty, plus an emphasis on frailty throughout the book, addresses the complex medical and social issues that affect care, and the specific knowledge and skills essential for meeting your patients' complex needs. New content brings you up to date with information on gerontechnology, emergency and pre-hospital care, HIV and aging, intensive treatment of older adults, telemedicine, the built environment, and transcultural geriatrics. New editor Professor John Young brings a fresh perspective and unique expertise to this edition.

Families Caring for an Aging America Dec 18 2021 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Measures for Clinical Practice and Research, Volume 2 Oct 28 2022 This volume covers assessment for instruments for use with adults.

Measurement in Nursing and Health Research Oct 04 2020 Winner of an AJN Book of the Year Award!. Now in its third edition, this classic text on the how-to's of measurement presents the basic principles and terminology, along with practical information, on how to design and implement measurement instruments in nursing and health care. The book is for nurses in a variety of roles, including student, educator, clinician, researcher, administrator, and consultant. An appendix of data sources and other measurement resources, including internet sites, completes the book.

Handbook of Assessment in Clinical Gerontology Jan 27 2020 New trends in mental healthcare practice and a rapid increase in the aged population are causing an explosion in the fields of clinical gerontology and geropsychology today. This comprehensive second edition handbook offers clinicians and graduate students clear guidelines and reliable tools for assessing general mental health, cognitive functioning, functional age, psychosocial health, comorbidity, behavior deficits, and more. Psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning are addressed in full, and a wide range of conditions and disorders common to this patient population are covered. Each chapter provides an empirical review of assessment instruments, assessment scales in their totality, a review of how these instruments are used with and adapted for different cultural groups, illustration of assessments through case studies, and information on how to utilize ongoing assessment in treatment and/or treatment planning. This combination of elements will make the volume the definitive assessment source for clinicians working with elderly patients. The most comprehensive source of up-to-date data on

gerontological assessment, with review articles covering: psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning Consolidates broadly distributed literature into single source, saving researchers and clinicians time in obtaining and translating information and improving the level of further research and care they can provide Chapters directly address the range of conditions and disorders most common for this patient population - i.e. driving ability, mental competency, sleep, nutrition, sexual functioning, demntias, elder abuse, depression, anxiety disorders, etc Fully informs readers regarding conditions most commonly encountered in real world treatment of an elderly patient population Each chapter cites case studies to illustrate assessment techniques Exposes reader to real-world application of each assessment discussed

Functional Assessment and Outcome Measures for the Rehabilitation Health Professional Jul 25 2022 Practical and unique, this is the only book to cover the instruments used by all rehabilitation disciplines. And better yet, it's the only book to describe and/or display instruments -- more than 40 that are used in general rehabilitation. A leading-edge resource, Functional Assessment and Outcome Measures for the Rehabilitation Health Professional helps you select the best outcomes measurement instruments; assess and measure function in physical, social, emotional, and vocational areas; and plan targeted interventions to promote independent living. Readers learn how to choose the best of current functional assessment measures and recognize the advantages and disadvantages of functional assessment, disease-specific, and general health measures.

Standards for the Management of Open Fractures Nov 24 2019 Standards for the Management of Open Fractures provides an evidence-based approach for the management of open fractures, focussing on lower limb injuries. It builds on and expands the NICE Guidelines to provide a practical approach with supporting evidence. The new edition has been extensively updated and expanded to include key aspects of management, ranging from setting up an orthoplastic service, through to dealing with the bone and soft tissue injures, complications such as infection, and patient rehabilitation and psychological care. The book is primarily aimed at trainee plastic, orthopaedic and trauma surgeons (particularly for expanding knowledge and examination revision) but would also appeal to established surgeons to improve patient care. Standards for the Management of Open Fractures is an open access title. It is available to read and download as a free PDF version on Oxford Medicine Online. It has been made available under a Creative Commons Attribution-Non Commercial No Derivatives 4.0 International licence.

Measuring Functional Capacity and Work Requirements Aug 22 2019 The Social Security Administration (SSA) is reengineering its disability claims process for providing cash benefits and medical assistance to blind and disabled persons under the Social Security Disability Insurance (SSDI) program and the Supplemental Security Income (SSI) Program (Title II and Title XVI of the Social Security Act). As one element of this effort, SSA has proposed a redesigned disability determination process. The agency has undertaken a multi-year research effort to develop and test the feasibility, validity, reliability, and practicality of the redesigned disability determination process before making any decision about implementing it nationally. SSA requested the National Academy of Sciences to review and provide advice on its research relating to the development of a revised disability decision process, including the approach, survey design, and content of the Disability Evaluation Study (DES). One of the committee's tasks is to examine SSA's research into existing and other developing functional assessment instruments for the redesign efforts and to provide advice for adopting or developing instruments for the redesigned decision process and the DES.

Neurodegenerative Diseases Dec 06 2020 As the global population ages the impact of neurodegenerative diseases like Alzheimer's disease and Parkinson's disease are significant forces in shaping human health and quality of life in the 21st century. Insights into understanding these diseases, and knowing how to treat them are major frontiers of scientific research. Neurodegenerative Diseases: Unifying Principles is the result of a conceptual revolution over the last decade in our understanding of neurodegenerative diseases as sharing unifying features. There is an increasing appreciation of the common biological and pathological features across seemingly varied neurodegenerative diseases that entail protein misfolding dysfunction and its consequences over time. Providing an overview of this conceptual change is the main theme for the book. Conventional approach emphasize the differences among neurodegenerative disorders, here Drs. Cummings and Pillai compile the increasingly compelling evidence that these disorders share many features and that insights in one may be rapidly translated into advances in another. The goal is to accelerate understanding by showing linkages among biological, pathological, can clinical aspects of this class of diseases. This collection of 19, inter-related chapters, articulates and broadens our view of the unifying features that initiate and drive disease progression across a variety of neurodegenerative diseases over time. This book will serve as an outstanding sourcebook of insights from experts that have played key roles in this story.

Measuring Health and Disability Jun 24 2022 "The World Health Organisation had just published a generic assessment instrument to measure general health and disability levels: the WHO Disability Assessment Schedule, WHODAS 2.0. WHODAS 2.0 is based on the International Classification of Functioning, Disability and Health (ICF). It was developed and tested internationally and is applicable in different cultures both in general populations and in clinical settings. It can be used as a general measure across all diseases. This manual is aimed at public health professionals, doctor, other health professionals (for example rehabilitation professionals, physical therapists and occupational therapists), health policy planners, social scientists and others involved in studies on disability and health." -- Publisher.

Functional Performance in Older Adults Nov 17 2021 Support the very best health, well-being, and quality of life for older

adults! Here's the ideal resource for rehabilitation professionals who are working with or preparing to work with older adults! You'll find descriptions of the normal aging process, discussions of how health and social factors can impede your clients' ability to participate in regular activities, and step-by-step guidance on how to develop strategies for maximizing their well-being.

Multidimensional Functional Assessment of Older Adults Jan 19 2022 Reliable, easily administered, and objective ways of assessing the well-being of the elderly and their use of, and need for, services are rare. The author of this study provides current information on the Multidimensional Functional Assessment of Older Adults (MFAQ) -- the most widely used questionnaire of its type. This volume discusses ways in which the procedure has been used and can be used by clinicians, program evaluators and planners. The book also examines OARS (Older Americans Resources and Services Program) MFAQ and how it permits assessment of the level of functioning in five areas: social, economic, mental health, physical health and self-care. Readers will find detailed and updated information on administration, hand and computer-based scoring, as well as use of the questionnaire.

Practitioner's Guide to Empirically Based Measures of Social Skills Jun 12 2021 Social skills are at the core of mental health, so much so that deficits in this area are a criterion of clinical disorders, across both the developmental spectrum and the DSM. The Practitioner's Guide to Empirically-Based Measures of Social Skills gives clinicians and researchers an authoritative resource reflecting the ever growing interest in social skills assessment and its clinical applications. This one-of-a-kind reference approaches social skills from a social learning perspective, combining conceptual background with practical considerations, and organized for easy access to material relevant to assessment of children, adolescents, and adults. The contributors' expert guidance covers developmental and diversity issues, and includes suggestions for the full range of assessment methods, so readers can be confident of reliable, valid testing leading to appropriate interventions. Key features of the Guide: An official publication of the Association for Behavioral and Cognitive Therapies Describes empirically-based assessment across the lifespan. Provides in-depth reviews of nearly 100 measures, their administration and scoring, psychometric properties, and references. Highlights specific clinical problems, including substance abuse, aggression, schizophrenia, intellectual disabilities, autism spectrum disorders, and social anxiety. Includes at-a-glance summaries of all reviewed measures. Offers full reproduction of more than a dozen measures for children, adolescents, and adults, e.g. the Interpersonal Competence Questionnaire and the Teenage Inventory of Social Skills. As social skills assessment and training becomes more crucial to current practice and research, the Practitioner's Guide to Empirically-Based Measures of Social Skills is a steady resource that clinicians, researchers, and graduate students will want close at hand.
