**Designing and Implementing Health Care Provider Payment Systems** Dec 10 2020 Strategic purchasing of health services involves a continuous search for the best ways to maximize health system performance by deciding which interventions should be purchased, from whom these should be purchased, and how to pay for them. In such an arrangement, the passive cashier is replaced by an intelligent purchaser that can focus scarce resources on existing and emerging priorities rather than continuing entrenched historical spending patterns. Having experimented with different ways of paying providers of health care services, countries increasingly want to know not only what to do when paying providers, but also how to do it, particularly how to design, manage, and implement the transition from current to reformed systems. 'Designing and Implementing Health Care Provider Payment Systems: How-To Manuals' addresses this need. The book has chapters on three of the most effective provider payment systems: primary care per capita (capitation) payment, case-based hospital payment, and hospital global budgets. It also includes a primer on a second policy lever used by purchasers, namely, contracting. This primer can be especially useful with one provider payment method: hospital global budgets. The volume's final chapter provides an outline for designing, launching, and running a health management information system, as well as the necessary infrastructure for strategic purchasing.

Fiction. "'Get it up ' demands the narrator of Frederick Mark Kramer's new novel, AMBIGUITY, of himself as he lies down to rest, as if his sexual energy could save him. However, for Kramer's narrator, Darko, sexual energy alone, although it abounds in Darko's memory, cannot save him. This is a novel about breath, or, as Darko calls it, 'the pneuma.' Darko says that 'the pneuma can mean the breath of life or the destruction of life, ' and in between is where this novel takes place. Clearly Darko uses his entire life as his inspiration here, 'inspiration' meaning 'breathing in.' Then Darko recounts this life in ten paragraphs that are gymnastic and acrobatic and celebrate corporeal existence. This is the 'perspiration, ' or the 'breathing through' life that Darko has exercised. His ten paragraphs, though, are ten breaths, ten exhalations, leading to a final 'breathing out, ' or 'expiration, ' as he takes to his bed, exhausted, demanding of himself a new beginning, not just the release of orgasm, but the orgasmic seeding of new life, a creative re-fertilization of the world and the rebirth of oneself. As always, Kramer is both resolutely readable and profoundly resonant in his work. Those familiar with his masterful novel Apostrophe/Paraphrase will find in AMBIGUITY that Kramer has produced another masterpiece that rivals the best works of anyone."--Eckhard Gerdes
