Making Of Economics, The (4th Edition) - Vol Ii: The Modern Superstructure Jun 02 2020 Volume II in *The Making of Economics, 4th Edition* series fills a major gap in the literature of economics, providing in brief fashion a complete treatment of high theory in economics. For example, common threads between Smithian classical economics and new classical economics are woven into the fabric of discussions directing the way to the higher theory. The new chapters on mathematics and econometrics, game theory, experimental economics, and globalization are not to be found in other surveys of what the author calls the 'Modern Superstructure of
