Middle East Construction Kit Oct 20 2021 A very readable introduction to the ancient Middle East, for conlangers and anyone interested in history and languages. The regions covered are Egypt, Canaan/Israel, Mesopotamia, and Persia, from prehistory to the Greek conquest. The book covers literature, history, religion, and everyday life, and contains meaty grammatical sketches of Sumerian, Akkadian, and Biblical Hebrew, including an explanation of how cuneiform evolved and how it worked. This part of history is of particular interest because it's full of firsts- the first agriculturalists, the first cities, the first writing systems. It's also full of colorful characters, from Gilgamesh and Enkidu, to the first named poet Enheduana, to the female pharaoh Hatshepsut, to the surprisingly anti-royalist prophet Samuel.

Policing the Planet Jul 25 2019 How policing became the major political issue of our time Combining firsthand accounts from activists with the research of scholars and reflections from artists, Policing the Planet traces the global spread of the broken-windows policing strategy, first established in New York City under Police Commissioner William Bratton. It's a doctrine that has vastly broadened police power the world over—to deadly effect. With contributions from #BlackLivesMatter cofounder Patrisse Cullors, Ferguson activist and Law Professor Justin Hansford, Director of New York-based Communities United for Police Reform Joo-Hyun Kang, poet Martín Espada, and journalist Anjali Kamat, as well as articles from leading scholars Ruth Wilson Gilmore, Robin D. G. Kelley, Naomi Murakawa, Vijay Prashad, and more, Policing the Planet describes ongoing struggles from New York to Baltimore to Los Angeles, ~~London~~

The World's Major Languages Mar 13 2021 The World's Major Languages features over 50 of the world's languages and language families. This revised edition includes updated bibliographies for each chapter and up-to-date census figures. The featured languages have been chosen based on the number of speakers, their role as official languages and their cultural and historical importance. Each language is looked at in depth, and the chapters provide information on both grammatical features and on salient features of the language's history and cultural role. The World's Major Languages is an accessible and essential reference work for linguists.

Gaming Sexism Jun 15 2021 Interviews with female gamers about structural sexism across the gaming landscape When the Nintendo Wii was released in 2006, it ushered forward a new era of casual gaming in which video games appealed to not just the stereotypical hardcore male gamer, but also to a much broader, more diverse audience. However, the GamerGate controversy six years later, and other similar public incidents since, laid bare the internalized misogyny and gender stereotypes in the gaming community. Today, even as women make up nearly half of all gamers, sexist assumptions about the what and how of women's gaming are more actively enforced. In *Gaming Sexism*, Amanda C. Cote explores the video game industry and its players to explain this contradiction, how it affects female gamers, and what it means in terms of power and gender equality. Across in-depth interviews with women-identified gamers, Cote delves into the conflict between diversification and resistance to understand their impact on gaming, both casual and "core" alike. From video game magazines to male reactions to female opponents, she explores the shifting expectations about who gamers are, perceived changes in gaming spaces, and the experiences of female gamers amidst this gendered turmoil. While Cote reveals extensive, persistent problems in gaming spaces, she

emphasizes the power of this motivated, marginalized audience, and draws on their experiences to explore how structural inequalities in gaming spaces can be overcome. *Gaming Sexism* is a well-timed investigation of equality, power, and control over the future of technology.

Survival Math Sep 26 2019 “A vibrant memoir of race, violence, family, and manhood...a virtuosic wail of a book” (The Boston Globe), *Survival Math* calculates how award-winning author Mitchell S. Jackson survived the Portland, Oregon, of his youth. This “spellbinding” (NPR) book explores gangs and guns, near-death experiences, sex work, masculinity, composite fathers, the concept of “hustle,” and the destructive power of addiction—all framed within the story of Mitchell Jackson, his family, and his community. Lauded for its breathtaking pace, its tender portrayals, its stark candor, and its luminous style, *Survival Math* reveals on every page the searching intellect and originality of its author. The primary narrative, focused on understanding the antecedents of Jackson’s family’s experience, is complemented by survivor files, which feature photographs and riveting short narratives of several of Jackson’s male relatives. “A vulnerable, sobering look at Jackson’s life and beyond, in all its tragedies, burdens, and faults” (San Francisco Chronicle), the sum of *Survival Math*’s parts is a highly original whole, one that reflects on the exigencies—over generations—that have shaped the lives of so many disenfranchised Americans. “Both poetic and brutally honest” (Salon), Mitchell S. Jackson’s nonfiction debut is as essential as it is beautiful, as real as it is artful, a singular achievement, not to be missed.

AstroNuts Mission One: The Plant Planet Dec 30 2019 This laugh-out-loud, visually groundbreaking read launches a major new series by children's literature legend Jon Scieszka. Featuring full-color illustrations throughout, a spectacular gatefold, plus how-to-draw pages in the back, it's an outer space adventure that demonstrates a giant leap for bookmaking and a giant leap for any kid looking for their next go-to series. AstroWolf, LaserShark, SmartHawk, and StinkBug are animals that have been hybridized to find other planets for humans to live on once we've ruined Earth. So off they rocket to the Plant Planet! Will that planet support human life? Or do Plant Planet's inhabitants have a more sinister plan? AstroNuts Mission One is a can't-put-it-down page-turner for reluctant readers and fans ready to blast past Wimpy Kid.

The Conlanger's Lexipedia Sep 18 2021 After creating a grammar, there's the 800-pound gorilla of the lexicon to deal with. This book gives you everything you need to know to create words. The first stop is etymology: it contains thousands of etymologies from a wide variety of languages. Borrow them or let them spark your own ideas! It's easy to let the lexicon be a coded version of your native language. The book contains tips on how to avoid this, including plenty of fascinating examples from non-English languages. You want to know which words to create first. It includes the 1500 words most commonly found in fantasy and science fiction, sorted by frequency. Many parts of the lexicon require real-world knowledge to handle. The Lexipedia contains just enough information on biology, physics, and human cultures to help you out. Plus, there's a discussion of the basic tools of the word creator: categories, metaphors, and derivation. Though aimed at conlangers, this book will be instructive and

students at a highly competitive performing arts high school

struggle and thrive in a rarified bubble, ambitiously pursuing

music, movement, Shakespeare, and, particularly, their acting

classes. When within this striving “Brotherhood of the Arts,” two

Dog & Hat and the Lost Polka Dots Sep 06 2020 Adventure Time, Nickelodeon, and Don't Hug Me I'm Scared meet in this wonderfully strange and funny adventure of two best friends. With its distinctive, comic strip-like art style and lighthearted, off-the-wall concept, this chapter book is a breath of fresh air for brand-new readers! Dog and Hat are two of the best friends you could ever hope to meet—they are practically inseparable. When the dots on Dog's favorite shirt get lost down a storm drain, it's up to him and Hat to wander through the twisting underbelly of the city to find them. As they navigate a labyrinth of sewers, they encounter a dark but exciting new world, unforeseen dangers, and help in unexpected places. Magic, humor, and curiosities abound in this story of a daringly weird dynamic duo that is sure to have adventurous young readers thrilled to be along for the ride. **TOTALLY UNIQUE:** The illustrations for this book are like nothing you've seen before! The loose, exaggerated style, bright, popping colors, and unconventional character design evoke 1990s cartoons and Sesame Street. Kids will delight in this playfully absurd book that's meant just for them. **A FRIENDSHIP STORY:** Dog and Hat are irresistible, charming characters, but it's the dynamic between them that truly shines. They are refreshingly supportive and affectionate, and they know each other in ways only best friends can. Readers will love getting to know this lovably strange duo as they work together, no matter what life throws at them! **COMIC BOOK APPEAL:** Kids familiar with comic books and graphic novels will feel right at home with this comic book-inspired story! It's bright, graphic, and sure to hold the reader's attention. **IT'S A SERIES:** Get ready for book two! This is just the first Dog and Hat adventure. Perfect for: • Kids who are fans of comics and graphic novels • New readers looking for a quirky, unique story • Fans of Nickelodeon and/or Adventure Time • Illustration and art fans

The New Climate War Apr 01 2020 Shortlisted for the FT/McKinsey Business Book of the Year award A renowned climate scientist shows how fossil fuel companies have waged a thirty-year campaign to deflect blame and responsibility and delay action on climate change, and offers a battle plan for how we can save the planet. Recycle. Fly less. Eat less meat. These are some of the ways that we've been told can slow climate change. But the inordinate emphasis on individual behavior is the result of a marketing campaign that has succeeded in placing the responsibility for fixing climate change squarely on the shoulders of individuals. Fossil fuel companies have followed the example of other industries deflecting blame (think "guns don't kill people, people kill people") or greenwashing (think of the beverage industry's "Crying Indian" commercials of the 1970s). Meanwhile, they've blocked efforts to regulate or price carbon emissions, run PR campaigns aimed at discrediting viable alternatives, and have abdicated their responsibility in fixing the problem they've created. The result has been disastrous for our planet. In *The New Climate War*, Mann argues that all is not lost. He draws the battle lines between the people and the polluters-fossil fuel companies, right-wing plutocrats, and petrostates. And he outlines a plan for forcing our governments and corporations to wake up and make real change, including: A common-sense, attainable approach to carbon pricing- and a revision of the well-intentioned but flawed currently proposed version of the [DellGreen](http://www.DellGreen.com)

global urban periphery - suburbanization - and the ways of life - suburbanisms - we encounter there. Richly detailed with examples from around the world, the book argues that suburbanization is a global process and part of the extended urbanization of the planet. This includes the gated communities of elites, the squatter settlements of the poor, and many built forms and ways of life in-between. The reality of life in the urban century is suburban: most of the earth's future 10 billion inhabitants will not live in conventional cities but in suburban constellations of one kind or another. Inspired by Henri Lefebvre's demand not to give up urban theory when the city in its classical form disappears, this book is a challenge to urban thought more generally as it invites the reader to reconsider the city from the outside in.

Sustainability Management Oct 08 2020 Can we grow our world economy and create opportunities for the poor while keeping the planet intact? Can we maintain our vibrant, dynamic lifestyles while ensuring the Earth stays productive and viable? Aimed at managers, students, scholars, and policymakers, Sustainability Management answers these questions in the affirmative, arguing it is possible for environmentally sustainable business practices and policies to foster economic and long-term growth. Written by a former analyst and consultant with the EPA, this book originally combines sustainable efforts in water, agriculture, urban, and power management to achieve in practice, not just in theory a sustainable planet and economy. Steven Cohen begins with the technical, financial, managerial, and political challenges of such a project, and then honestly assesses sustainable practices in the manufacturing and service industries. He addresses renewable and carbon-free energy production; water sustainability, especially with regard to energy issues involving filtration, distribution, and changing rainfall patterns; food cultivation and distribution; and ways to maintain the interdependent systems on which we depend to live.

Building Imaginary Worlds May 27 2022 Mark J.P. Wolf's study of imaginary worlds theorizes world-building within and across media, including literature, comics, film, radio, television, board games, video games, the Internet, and more. *Building Imaginary Worlds* departs from prior approaches to imaginary worlds that focused mainly on narrative, medium, or genre, and instead considers imaginary worlds as dynamic entities in and of themselves. Wolf argues that imaginary worlds—which are often transnarrative, transmedial, and transauthorial in nature—are compelling objects of inquiry for Media Studies. Chapters touch on: a theoretical analysis of how world-building extends beyond storytelling, the engagement of the audience, and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's *Odyssey* to the present internarrative theory examining how narratives set in the same world can interact and relate to one another an examination of transmedial growth and adaptation, and what happens when worlds make the jump between media an analysis of the transauthorial nature of imaginary worlds, the resulting concentric circles of authorship, and related topics of canonicity, participatory worlds, and subcreation's relationship with divine Creation Building
