The Einstein Hoax Sep 27 2022 Much of this book was written a long time ago when the author first became aware of the concepts of Special and General Relativity. At the time he assumed that the subject was well thought out and understood by people more knowledgeable and probably more intelligent than himself. His goal was to learn from them and to understand the phenomena that was being described. He could not, however, accept the prevalent idea that the workings of Nature were beyond the ability of mere mortals to understand at the 'common sense' level. As he studied the subject, he learned that this dictum was an intellectual 'con game' by men who were acting in the manner of a priesthood defending the 'true faith' rather than scientists and who, when challenged on points which a bright physics or engineering student would easily understand, showed a rather limited ability to reason and covered their limitations by asserting that it was the challenger's limitations which prevented understanding. The dictum is not true, the mechanisms by which Nature operates are, for the most part, easily understood by reasonably bright (and interested) high school students, and the necessary mathematics and arguments to evaluate their validity of the are within knowledge of sophomore students of engineering and/or physics.(A knowledge of Integral Calculus, Elementary Physics, and Dimensional Analysis is all that is required for reader to check the material presented for himself.) It is the purpose of this book to make these mechanisms understandable to the general reader. This book contains three sections. The main section, 'The Einstein Hoax', starts with a description of the early history of Special and General Relativity and proceeds to show that the earlier published Lorentz Transformation-Aether Theory is, except for philosophical interpretation, identical to Einstein's Special Theory of Relativity and, in fact is a special case solution of that theory. As such, the Aether Theory must be a valid option if Special Relativity is to be considered valid. The Aether Theory, however, is easily understood in terms of 'common sense' while an examination of the conclusions of Special Relativity yield logical absurdities which no rational mind should be willing to accept. But, fair is fair, the proof of a theory or its interpretation is, and should be, in the experimental evidence. Fortunately, experiments in the field of Quantum Physics have demonstrated that photons emitted as pairs are coupled by their 'quantum numbers' (in this case their direction of

polarization) and changing the plane of polarization of one of the photons changes the plane of polarization of the other. The interesting conclusion of these experiments is that the velocity of that coupling is at least four times the velocity of light and may even be infinite. A minor modification of the experimental setup would allow the effect to be used to determine the absolute velocity of the laboratory through space to an accuracy of better than 400 miles per second. Since the interpretation associated with Special Relativity cannot tolerate the idea of an absolute velocity, we must revert to the Lorentz Transformation-Aether Theory because Dr. Einstein's interpretation of Space-Time falls on its face. General Relativity is based upon the Principles of Relativity and of Equivalence, but a glance at its conclusions (the gravitational equivalents of the Lorentz Transformations for Velocity effects), shows that it erroneously yields results inconsistent with those principles. It yields a gravitational transformation for time which is not multiplicatively commutative (the property which allows Special Relativity to work) and yields a transformation for length of unity (the equivalent Lorentz Transformation for Length is the reciprocal of the Lorentz Transforma

Eleanor Roosevelt's Book of Common Sense Etiquette Mar 09 2021 In an era of incivility, discover a timeless guide to good manners from First Lady Eleanor Roosevelt. "The basis of all good human behavior is kindness," says Eleanor Roosevelt in this classic handbook, first published in 1962 as a "modern book of etiquette for modern Americans." As a politician, diplomat, and activist, as well as the longest-serving First Lady of the United States, Mrs. Roosevelt knew that thoughtful, civil behavior was essential to peaceful, productive relationships. In this etiquette guide, she teaches that decorum is not about strict adherence to formal rules; it is about approaching all social situations with consideration for others. She advises, "If ever you find yourself in a situation in which following a formal rule would be manifestly unkind, forget it, and be kind instead." Drawing from her personal and professional experiences, Roosevelt covers a broad range of topics, including business dealings and family affairs, writing letters and receiving guests, and entertaining at home and traveling abroad. Beginning with the necessity of good manners between husband and wife, she considers the importance of courtesy in society at large and the role all Americans play as ambassadors of democracy while visiting foreign countries. In an era of incivility, Eleanor Roosevelt's Book of Common Sense Etiquette is more relevant than ever. This ebook has been professionally proofread to ensure accuracy and readability on all devices.

For Pet's Sake, Do Something! Book One Aug 22 2019 "Where can pet parents go to find a compilation of information that will help them support their pets' various physical, emotional and spiritual needs?" A frequently asked question in my practice—Dr. Monica There usually comes a time toward the end of our pets' lives when we need to let go and let nature

take its course. But in the face of most of the distresses and health challenges our pets encounter in daily living, we don't need to stand by crying helplessly and feeling sad. We can—Do Something! Yet, where can pet parents go to find a compilation of information, which will help them support their pets' various physical, emotional and spiritual needs? As I finished writing my second book, *Pets Have Feelings Too!*, it was this very question that impelled me to begin yet another book—one that would be a “how to” guide for everyone who wants to do everything they can to help their pets, especially when their pets are in distress or experiencing health challenges of any kind. It all began with my desire to respond to the question, asked by so many of my clients and students over the years, “How can I talk with my pets?” But there were so many other topics which sprang to mind as I continued to write that before I knew it, I had enough material for a series of three “how to” books: • *How To Communicate With Your Pets and Help Them Heal*; • *How To Heal Your Pets Using Nutrition, Herbs and Supplements*; and • *How To Heal Your Pets Using Alternative Therapies*. This, the first book in the series, begins by teaching you how to communicate with your pets about everyday things, as well as their health challenges. But discovering what your pets want to tell you is only the beginning. Once you're truly aware of their needs, you must then Do Something! That “something” usually involves restoring balance and harmony in their lives. So, the second part of the first book shows you how to use spiritual and energetic healing methods as one way to bring about that balance and harmony. There are also a series of guided meditations to enable you to help your pet cope with a variety of life situations. The second book of the series covers the importance of nutrition, herbs and supplements, plus foods to avoid, and recipes for pets with special needs. The third book presents practical healing modalities including homeopathy, flower essences, incense, essential oils, crystals, color, sound, massage, magnets, hydrotherapy, acupressure, acupuncture and chiropractic, plus some other helpful guidance. As I was writing all three books, I knew many readers would wonder what qualifies me to teach people how to communicate with and heal their animals. What experiences and training did I have that prepared me not only to do this, but also to teach others to do the same? To answer this question, I'd like to share a few of the highlights of my life with you. I've known that I can understand what animals are saying ever since I was eight years old. However, when I was young, other children used to call me weird or crazy, and that was very painful. I didn't want to be different, so I tried hard to push aside the images animals were sending me and make believe I wasn't receiving them. But by my late teens, I began to realize that what I was experiencing was a gift—one that was becoming virtually impossible to ignore. So I nurtured this gift, and soon I grew more confident about using my abilities. I began communicating with many different species of pets and was delighted to be able to help them and their humans better understand each other. In time, I realized

that I'd taken the first step on the path of what I considered to be my Life Assignment. But I'd also been searching for answers to many spiritual questions for the better part of my life. The answers to those questions came one at a time over several years. I read a lot of books and attended many classes. One of those classes, offered by a Vietnamese gentleman, Master Tam Nguyen, would change the direction of the rest of my life and teach me how to use my intuitive gift more fully. From him, I learned that healing is about restoring balance and harmony, that healing is available to everyone, and that we can bring about healing for ourselves and for others. During the last week of Master Tam's class, he was able to help me experience the Life Force Energy that always surrounds every living being. This loving, healing Light and Energy surrounded me in a way I'd never felt it before. When the class exercise was over, I was crying. For the first time in my life, I'd been able to feel this energy. It came charged with such Love that I felt God had just embraced me. Master Tam approached me after class and encouraged me to continue to learn to let this loving, healing Energy flow through me for the benefit of others. He also invited me to come to his Center. I think I went the first time because I was curious, but I kept going back because I was learning so much about helping others to heal, not only spiritually, but also physically. I was drawn to return again and again. Observing many healing experiences filled me with the desire to further deepen my knowledge and understanding of metaphysics, and it was this study that would gently lead me along the path of unconditional love. And what better way to express unconditional Love for someone than by bringing balance and harmony into their lives through healing. Through Master Tam's teachings, I'd already been introduced to the technique of Cosmic Healing, which helps every living being function, as it should in perfect harmony with the Universe. Cosmic Healing doesn't use any physical modalities like touch or medicine. Instead, it's done spiritually, from the heart, and with love. This type of healing requires direct communion with the Source of All Life, God, Spirit, Life Force, Supreme Being, All That Is. In the process of learning to tune in to this loving, healing Energy, the skeptic in me reacted by asking, "If healing energy always surrounds everyone all the time, why isn't everyone accessing it more often? And why do we see so much sickness around us? What, if anything, can we do to bring healing to others, or to help people find healing for themselves?" With patience and further experience, I began to understand that often, people in need of healing haven't learned to ask for help, or they feel they don't deserve it. Most of them know they want to be healed but they don't ask to be healed. They may not even know how to ask. So what should we do to find effective healing? First, we need to believe that healing is possible, that it does take place, and that we can heal ourselves. We also need to have confidence that the healing energy of The Universe can flow through us, or flow to us through others. Above all, the person needing healing, and the person helping, must take

time to be in communion, or attunement, with the one true Source of All Life. Then we must stop looking at the problem itself and start focusing on our connectedness to, and our oneness with, the Source of our Being, the Source of our balance and harmony. When we once again fully remember our oneness with Spirit, we're then able to manifest abundant good health for ourselves and for others. For a number of years, I helped many people heal, and I communicated with many pets about everyday things, but I'd never thought about combining my gift for healing with my gift for communicating with animals. It was one of my own precious Shih-Tzus who would show me the way. Chop Chop was only two years old when, one day, he was lying beside me with his eyes fixed somewhere on the horizon. He was giving up, and death seemed to be looming not many hours away from him. Unable to think clearly, all I could do was to keep him company, crying because there didn't seem to be anything else I could do to help him. Two different veterinarians had already closely examined him. Medications were no longer effective, and the prognosis was very bleak. I lay on blankets on the floor next to him to give him what comfort I could. But as I reclined there beside him on the floor, feeling very sad and miserable, he sent me a telepathic message just as clear as day: "You call yourself a healer. You've helped a lot of people. So Do Something!" He now looked me straight in the eye as he prompted me to be an active participant, not just a sorrowful bystander. What he said to me kept playing over and over again in my mind until I finally got it. His plea was very simple, yet I hadn't thought to use spiritual healing for him, or for other animals for that matter. I'd only used it to help people. But that was about to change. He responded, literally overnight, to the first healing treatment I gave him, and within a week of continued treatments, he was completely back to being his normal happy self. You can read the full account of his story in Chapter 1 of my first book, *What Your Animals Tell Me*. Thanks to the lesson Chop Chop taught me, I knew, then, that it was time to combine my gift for healing spiritually with my gift for communicating with animals. There were many other intuitives available to help heal people, so from then on, I resolved to dedicate my life exclusively to helping only animals. My work now includes not only private consultations for pets, but also presenting classes, workshops and lectures, as well as doing extensive research, and writing books to share with others all that I've learned about how we can make life better for our beloved pets. During the early part of my experience with Chop Chop, I could only cry, feel sorry for myself and for him, and wait for the inevitable. I felt completely inadequate, totally devoid of ideas, and utterly helpless. Later on, it occurred to me that many pet parents often feel just as I did whenever they're faced with their pets' illnesses. But you don't need to go through those same feelings because there are so many things you can do, either to help your pets heal, or at least go through the process of their illness or pain with less discomfort. To help you, I've described as many healing modalities as possible in the three books of this

series, *For Pet's Sake, Do Something!* If you're able to ease your pet's pain, or provide quality of life for another day, week, month or even longer by implementing any of the healing techniques described in these books, your time and money spent on them will have been well worth it. My teacher and beloved animal friend, Chop Chop, taught me that I didn't have to be a bystander. Thanks to him, when I was on the verge of giving up, I discovered instead that I could Do Something! I hope you'll Do Something too. Healing can be brought about in many ways, not only for your pets, but also for yourself. When you're able to be an active participant in your pet's care, or bring peace and comfort to your pet because you've been able to Do Something, your spirit will also be healed. What's Your Superpower? Oct 28 2022 It's never too early or too late to uncover the superpowers that are hidden inside you. Using insights from brain research labs, it is possible to sharpen your faculties and empower yourself. Ultra Special Senses (USSs) are a set of perceptive abilities of the brain—they form the building blocks of superpowers. In a conversational style, Dr Anjana Sen reveals how strengthening your fifteen USSs can build reserve capacity for coping, increasing resilience and enhancing leadership attributes. Demystifying courage and self-awareness, the author urges you to align with your USSs to bring out the best in you.

The Problem of the Essential Indexical Nov 17 2021 A collection of twelve essays by John Perry and two essays he co-authored, this book deals with various problems related to "self-locating beliefs": the sorts of beliefs one expresses with indexicals and demonstratives, like "I" and "this". In the early essays, Perry argues that an account of these beliefs requires us to distinguish what is believed from how it is believed, and the rest of the essays discuss various aspects and implications of that distinction and issues closely related to it. Included with such well-known essays as "Frege on Demonstratives", "The Problem of the Essential Indexical", "From Worlds to Situations", and "The Prince and the Phone Booth" are a number of important essays that have been less accessible and that discuss important aspects of Perry's views, which stem from the area

of thought referred to as "Critical Referentialism" on the philosophy of language and the philosophy of mind. In addition, postscripts have been added to a number of the essays discussing criticisms by authors such as Gareth Evans and Robert Stalnaker.

Missing You and Branded Different Nov 24 2019 The Missing You collection of poems is a personal journey through the different stages of the writer's life and it reveals the gamut of emotions the soul goes through such as the joy of rekindled love and the agony of betrayal, the loss of a beloved sibling, the uncertainties of what lies ahead, hopes and general observations of life as she perceives it. Readers can relate to many of the experiences as they are revealing of the human psyche and not uncommon to people who live, love and hope. Branded Different " What if I refuse? " Defiance sprang up in me. A shadow flickered across her face. Then she changed her tone to a menacingly sweet one. A chill crept down my spine. " Refuse? There's no such word in this house. Ah Lek! " A burly man entered in response to her call, grinning evilly. " Ah Lek deals with any naughty girl who refuses. Ah Lek ." Ah Lek moved towards me silently. There was a cigarette dangling between his fingers. A gleam of pleasure lighted up his face as he yanked up my right leg. I was shocked beyond words. He threw my shoe across the room and pressed the burning end of the cigarette against the sole of my foot. I screamed as pain shot through me. It was excruciating. " Alright, Ah Lek. You may go. " I whimpered at the burning pain in my foot. All defiance died and I slumped in defeat as Ma Chieh's cold voice rang out. " I'm sure you will be more discreet. Remember, the next time will be worse. Put this on your foot and change into this. " She locked the door behind her and left me to my despair. I put the salve on my sole. It relieved the pain. Then I changed into the silk kimono, a lovely pink with cherry blossoms. A sense of utter helplessness overcame me. Oh God! Was this really happening to me? I pinched myself. It hurt. There was nothing I could do except wait for this mysterious visitor. Perhaps he could even help me out of this. It was no use crying. The hours ticked endlessly by and the day turned into night. I sat on the bed, all keyed up. Terror and despair engulfed me as I waited for whatever was to come. At last footsteps echoed in the corridor. Find out what happens to Su who has been sold by her aunt's son upon her death.

It Shouldn't Be This Way Jan 07 2021 Every life-changing experience, be it the loss of a function, a job or a friendship, or the death of a loved one, can be excruciating. Illness can forever alter our life and our abilities. And what makes it even more challenging is that many other people might fail to understand how challenging our adjustment to "normalcy" might be. Because there is no "normal" in these experiences. How can there be? When people hear the word acceptance, they might assume that it means being OK with what happened in the past or with how things currently are. In fact, there is a difference

between acceptance and "feeling good" about what happened - acceptance means allowing yourself to feel whatever emotions naturally come up in response to what you are going through. It means acknowledging the reality of the pain, even though in an ideal world, it shouldn't be that way. This therapeutic and comforting self-help guide will help you: · Give yourself the permission to grieve or process events in the way that makes sense to you · To fully experience and accept your feelings of anger, grief, frustration or anxiety · To own your truth, even if it makes others uncomfortable This essential book will teach you to understand and be able to accept the difficult moments and circumstances in your life and make room for how you feel about them. And with this kind of an acceptance, there can be healing.

Special Education Jun 24 2022 ‘Special Education’ includes all aspects of education which are applied to exceptional children i.e. Physical, Mental, Disadvantaged, Gifted, Creative, Delinquent, Slow learner etc. The special education means specially designed instructions which meet the special education and related needs of exceptional children. It is something different from regular educational programme designed for non-exceptional children by some unusual quality, something uncommon, noteworthy. It includes something special for e.g. special materials, special training techniques, special equipments, special help and/or special facilities may be required for special categories of children having special needs. This book serves as a comprehensive introduction to the dynamic field of special Education. The objective of the course is to provide undergraduate students with the knowledge, skills, attitudes and beliefs that are crucial to construct learning environments that enable children with special needs to reach their potential. The present book titled ‘Special Education’ is designed according to the latest syllabus of university of Jammu under Choice Based Credit System (CBCS) in the form of a skill Enhancement Course in Education to cater the needs and aspirations of under graduate students.

Concepts of Biology May 23 2022 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall

organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

James Bridie: Clown and Philosopher Jun 12 2021 This critical analysis of twelve of the plays of James Bridie (1885-1951) illustrates that throughout Bridie's work there exists a philosophical continuity which can be traced through three stages of moral awareness and which when recognized goes far in defining Bridie's genius. Bridie, as the study attempts to show, was essentially a moralist, and his plays are in a special sense morality plays; thus his original use of religious myth is explored, particularly his use of the myth of the fall from innocence. Bridie's first play, *The Switchback* uses the myth of Adam's temptation and fall to tell the story of a Scottish physician's struggle to meet both self and social responsibilities. Four other plays, *Tobias and the Angel*, *The Girl Who Did Not Want to Go to Kuala Lumpur*, *Marriage Is No Joke*, and *The Black Eye*, again deal with the Fall, this time with innocent Adams who remain oblivious of the demons tempting them to leave their particular Garden of Eden. The discussion of *Tobias* also introduces Bridie's use of the Prodigal Son story. The disillusionment of experienced Adams is studied in the late plays; the disillusioned Adam of the last Play, *The Baikie Charivari*, seems to be a modern-day Pontius Pilate. Aside from exploring the mythical content of the plays, Helen L. Luyben defends Bridie as a craftsman against accusations that he was a bungler. She maintains that the structure of the plays is not diffuse but carefully plotted, as is apparent in the conscious use of myth (supported by a metaphysical use of language) and in the common structural techniques found throughout the plays. As Bridie's morality goes beyond the limits of logic, so his structure disregards the limitations of realistic drama, demanding dramatic forms--farce and fantasy--which will encompass the illogical and portray a higher reality than the realistic form. Thus his language operates both on a literal and poetic plane. Finally, Bridie's moral affinity with Shaw and Ibsen is explored, not with the intention of tracing literal borrowing, but to clarify Bridie's philosophical and dramatic intention.

Making Sense of Human Rights Jul 01 2020 This fully revised and extended edition of James Nickel's classic study explains and defends the contemporary conception of human rights. Combining philosophical, legal and political approaches, Nickel explains international human rights law and addresses questions of justification and feasibility. New, revised edition of James Nickel's classic study. Explains and defends the conception of human rights found in the Universal Declaration of Human Rights (1948) and subsequent treaties in a clear and lively style. Covers fundamental freedoms, due process rights,

social rights, and minority rights. Updated throughout to include developments in law, politics, and theory since the publication of the first edition. New features for this edition include an extensive bibliography and a chapter on human rights and terrorism.

The Cloud of Unknowing Oct 24 2019 THE CLOUD OF UNKNOWING and THE BOOK OF PRIVY COUNSELING are the first explorations in the English language of the soul's quest for God. Written in Middle English by an unknown fourteenth-century mystic, THE CLOUD OF UNKNOWING expresses with beauty a message that has inspired such great religious thinkers as St. John of the Cross and Teilhard de Chardin, as well as countless others in search of God. Offering a practical guide to the life of contemplation, the author explains that ordinary thoughts and earthly concepts must be buried beneath a "cloud of forgetting," while our love must rise toward a God hidden in the "cloud of unknowing." THE BOOK OF PRIVY COUNSELING, also included in this volume, is a short and moving text on the way to enlightenment through a total loss of self and a consciousness only of the divine. William Johnston, an authority on fourteenth-century mysticism and spirituality, provides an accessible discussion of the works, detailing what is known about the history of the texts and their author. In a new foreword, Huston Smith draws on his extensive knowledge of the varieties of religious experience to illuminate the relevance of these works for contemporary readers.

Thought-Contents Jul 25 2022 This book provides a formal ontology of senses and the belief-relation that grounds the distinction between de dicto, de re, and de se beliefs as well as the opacity of belief reports. According to this ontology, the relata of the belief-relation are an agent and a special sort of object-dependent sense (a "thought-content"), the latter being an "abstract" property encoding various syntactic and semantic constraints on sentences of a language of thought.

Warning! Jul 13 2021 Warning! Reality May Not Be Compatible with Your Worldview explains how the most significant event in human history was the awakening of intellectual consciousness, and the ability to make informed decisions based on careful observation, logic, and critical reasoning. Author P. A. Ransom explores the evolution of the brain, what reality is, and how we search for it in our complex world. He addresses the question of our assumptions about truth and faith, and how

when faith is added to the equation, it can destroy the credibility of anything it wishes. We all live in a world that is constructed in the mind. Our senses tell us that the world is real. We just accept as fact that what our senses reveal to us is not an illusion. Yet even our senses can be tricked: if you have experienced an illusion like a magic trick or special effects, you know how easily the brain can be deceived. What we think we know is sometimes far from the truth. No matter how well considered our knowledge is, it is always subject to change as our understandings evolve. It would be prudent, then, to reexamine our beliefs. Warning! Reality May Not Be Compatible with Your Worldview exposes the truth about dogma and rituals that lead our minds into delusional beliefs. When we embrace ignorance, we turn our backs on truth and close our minds to new ideas and discoveries.

A FAMILY OF WHISPERS Mar 29 2020 This could possibly be the last chance for you to know the truth about life, death, the afterlife, and God. If you bypass this book or purchase it and not read it, you will have missed the opportunity of a lifetime. This opportunity may never come your way again so take this book seriously. If you do make the right decision, purchase this book, and read it, you will be doing a life-changing thing, and you will never regret your decision because you have chosen the truth. If you are a devout christian, you may think this book isn't for you. It is not only for you, but also for all of humanity. Not all of humanity will accept the contents of this book. The ones that do accept it shall receive their reward; the others, not so much. One of the writers of this book is in spirit form, and the other is Paul Wayne Daniels. You can complain about this book, but you won't be able to complain about it to Paul because he will be deceased before the book is mass-produced.

The Tribal Moment in American Politics May 11 2021 In the tribal moment in American politics, which occurred from the 1950s to the mid- to late-1970s, American Indians waged civil disobedience for tribal self-determination and fought from within the U.S. legal and political systems. The U.S. government responded characteristically, overall wielding its authority in incremental, frequently double-edged ways that simultaneously opened and restricted tribal options. The actions of Native Americans and public officials brought about a new era of tribal-American relations in which tribal sovereignty has become a central issue, underpinning self-determination, and involving the tribes, states, and federal government in

intergovernmental cooperative activities as well as jurisdictional skirmishes. American Indian tribes struggle still with the impacts of a capitalist economy on their traditional ways of life. Most rely heavily on federal support. Yet they have also called on tribal sovereignty to protect themselves. Asking how and why the United States is willing to accept tribal sovereignty, this book examines the development of the order of Indian affairs. Beginning with the nation's founding, it brings to light the hidden assumptions in that order. It examines the underlying deep contradictions that have existed in the relationship between the United States and the tribes as the order has evolved, up to and into the tribal moment. "

Feminine Sense in Southern Memoir Jul 21 2019 "Lillian Smith, Ellen Glasgow, Eudora Welty, Lillian Hellman, Katherine Anne Porter, and Zora Neale Hurston are distinctly varying and individual writers of the American South whose work is identified with the Southern Literary Renaissance. This intertextual study assesses their autobiographical writings and their intellectual stature as modern women of letters. It is the first to include these writers in the socio-history of modern southern feminism and the first to group them in the discourse of modern American liberalism." "In the confessional tract Killers of

the Dream (1949, 1961) Smith's focus upon ethics, racism, and sexism rather than upon conventional southern themes sharply disrupts the ideology of conservative forces in the mainstream of southern literary criticism. In *Feminine Sense in Southern Memoir* dominant themes from Smith's autobiography are synthesized as other liberal feminine voices in the chorus of southern memoirs examine norms of gender, problems of race, and patriarchal power structures. Ellen Glasgow's *The Woman Within* (1954) and Eudora Welty's *One Writer's Beginnings* (1984) center on the woman writer's inner life and demonstrate the legitimacy of making this life the object of public attention. Lillian Hellman's *Scoundrel Time* (1976) and Katherine Anne Porter's *The Never-Ending Wrong* (1977) define the individual in conflict with reactionary forces in modern America. In *Dust Tracks on a Road* (1942, 1984) Zora Neale Hurston connects the problems of gender, region, nation, and race." "By stressing the significance of a liberal tradition in southern women's autobiographical writings, *Feminine Sense in Southern Memoir* reconceptualizes the role of the southern woman of letters and her contributions to the literature of the modern South."--BOOK JACKET. The Spectrum, 1937 (Classic Reprint) Dec 18 2021 Excerpt from *The Spectrum, 1937* OU are identified with a number of superlatives You have had more practice teaching, and more continuous, y than any preceding year. You are the smallest class in the history of the school. You are the most recent class that has graduated. The first record should carry with it a marked value which you will appreciate next year. The second should bring economic advantage to you and to other teachers. The last is but adventitious. Teachers, I believe, are in a special sense expected to live a life of superlatives. They accept a responsibility, in the exercise of which, example is their most potent instrument. At no time can they afford to fall short of their best. Belief, Inference, and the Self-Conscious Mind Sep 15 2021 It is impossible to hold patently contradictory beliefs in mind together at once. Why? Because we know that it is impossible for both to be true. This impossibility is a species of rational necessity, a phenomenon that uniquely characterizes the relation between one person's beliefs. Here, Eric Marcus argues that the unity of the rational mind--what makes it one mind--is what explains why, given what we already believe, we can't believe certain things and must believe certain others in this special sense. What explains this is that beliefs, and the inferences by which we acquire them, are constituted by a particular kind of endorsement of those very states and acts. This, in turn, entails that belief and inference are essentially self-conscious: to hold a belief or to make an inference is at the same time to know that one does. An examination of the nature of belief and inference, in light of the phenomenon of rational necessity, reveals how the unity of the rational mind is a function of our knowledge of ourselves as bound to believe the true. Rational self-consciousness is the form of mental togetherness.

It's Not THAT Complex! Oct 04 2020 The purpose in writing 'It's NOT That Complex' is based on the belief that Americans are abandoning their innate ability to form common-sense opinions and act on them as opposed to accepting popular perspectives from the media or others in their social or business circles. This 'abandonment' is subtle and regularly defended because it requires a certain amount of effort to step back, analyze issues, identify the real problems and simplify discussions. All too often we watch others debate symptoms and never insist on discussing the underlying problem(s). We passively accept the analysis of others and retreat into a zone of denial, believing that 'things can't be that bad'. We continue to live comfortably without understanding that a new level of proactive, vocal participation is necessary! With the ever increasing number of information sources confronting us each day, determining which ones are credible and which ones are downright misleading can be an overwhelming task. Combined with the pressures of everyday tasks and responsibilities, it is far too easy to form beliefs and opinions without stopping to analyze which sources are relatively objective and which ones are downright self-serving. I say 'relatively' objective because few information sources are truly objective in that their mere existence often depends, to a certain extent, on promoting one viewpoint or another. This book's organizational style was designed simply to allow a reader to pick and choose which topics are most relevant or important and read them in any order. The quotes included establish that the ideas I am promoting are not new or original. Most of them originated long ago from very intelligent folks. I have also avoided using specific current events or individuals as illustrations (which would have been very easy to do) in the interest of making this book applicable over a long period of time. I will undoubtedly be accused of over-simplifying complex issues. While many of these topics may deserve a much longer dissertation, most do not benefit by

lengthy debates that overly complicate simple, logical conclusions. My purpose is simply to encourage everyone to think, refuse to accept the opinions of the masses, and stand up for what is logical, right and sensible. It is the only way our country will find a new and productive direction. Not a single idea or suggestion in this book is impractical or impossible to apply! In order to be implemented, the recommendations discussed require an open mind, considerable personal effort, and a willingness to accept change. The changes necessary will be painful for some short-term but very beneficial long-term for all. Our future prosperity and security are at stake! Along with a recognition of these principles is the need for a new breed of leadership - leaders with common sense that are not afraid to speak to unpopular viewpoints and sell the obvious solutions to the masses. The intelligence and fortitude of individual citizens can reorient our country and culture. The first step is to identify with these important principles - loudly and passionately! When it doesn't make sense, don't let it stay that way

The Knowledge Gap Dec 06 2020 The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

Adolescent Psychological Development Feb 26 2020 The huge and fractured literature on adolescence challenges both students and scholars. For students there is too much to learn and too little coherence across topics to enable deeper

understanding. For scholars, there are few integrative visions to connect minitheories, research programs, and practical concerns. In the first edition of this advanced text, Moshman provided a constructivist synthesis of the literatures of cognitive, moral, and identity development, from the classic universalist theories of Piaget, Kohlberg, and Erikson through the more pluralist research and theorizing of the late 20th century. Without assuming any prior knowledge of psychology, he introduced and coordinated basic concepts to enable students to wrestle with the questions of concern to experts and help experts see those concerns from a larger perspective. In this thoroughly updated second edition, Moshman develops his conceptualization of advanced psychological development in adolescence and early adulthood and proposes--in a new chapter--a conception of rational moral identity as a developmental ideal. Unlike the prototypical changes of early childhood, advanced psychological development cannot be understood as progress through universal stages to a universally achieved state of maturity. Progress is possible, however, through rational processes of reflection, coordination, and social interaction. Religious Discovery, Faith, and Knowledge Apr 10 2021 The purpose of this book is to raise the possibilities of religious knowledge and religious discovery. By religious knowledge and discovery I mean knowledge and discovery of God, and by possibility I mean a viable possibility, the kind that a new look under a new light finds; I do not mean a minimal or a "logical" possibility. -- Introduction.
